DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1 and 4-13 (each in part), drawn to a method of facilitating *regeneration, growth, and/or development* of a central nervous system in an animal or bird.

Group 2, claim(s) 2 and 4-13 (each in part), drawn to a method of *regulating axon guidance* in an animal or bird.

Group 3, claim(s) 3 and 4-13 (each in part), drawn to a method for facilitating the *repair or replacement of axons* in an animal or bird.

Group 4, claim(s) 14, 16, and 17 (each in part), drawn to a genetically modified animal producing **reduced levels** of an Eph receptor or ligand thereof or their functional equivalents.

Group 5, claim(s) 15, 16, and 17 (each in part), drawn to a genetically modified animal producing **elevated levels** of an Eph receptor or ligand thereof or their functional equivalents.

Art Unit: 1647

Group 6, claim(s) 18-20, drawn to a **composition** useful in facilitating regeneration, growth, and/or development of a control nervous system or regulating axon guidance or facilitating repair or replacement of axons or repair of nervous tissue.

4. The inventions listed as Groups I, II, III, IV, V, and VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

5. Group I recites the technical feature of facilitating regeneration, growth, and/or development of a central nervous system in an animal or bird, which is not required by the other Groups II, III, IV, V, or VI.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, separate search requirements, and/or different classification, restriction for examination purposes as indicated is proper.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
